## Anatomy:

- Anatomists versus anatomy departments (*Editorial*), Crafts, 979
- Changing role of surgery in anatomy instruction, Eiseman *et al.*, 393
- Critical evaluation of research and teaching in (*Editorial*), Stokes, 978
- Experiment in teaching, Sinclair, 401
- Reviews of films on embryology, histology, and (Apr., Part 2), 1
- Use of videotape recordings for examinations in, Markee *et al.*, 214

## Animal Care:

- Education in laboratory animal medicine, Pick, 1063
- Educational potential of animal research facilities (*Communication*), Lutsky and Ellison, 385

## Association of American Medical Colleges

- Annual Awards (1965): Abraham Flexner Award to Joseph Treloar Wearn, Handler, 1009; Alan Gregg Lecturer—Ward Darley, Wolf, 1013; Borden Award to Paul Charles Zamecnik, Gurin, 1016
- Coggeshall Report (*Editorial*), Cooper, 700
- Committees of (1963-64), 618
- Continuation Education, Third Annual Conference on, 530
- Deans and representatives of government, meeting of, 542
- Division of Education: Study of applicants, 1964-65, Johnson, 1017; Study of medical student attrition: Overview and major findings, Johnson, 913; School characteristics and dropout rate, Hutchins, 921
- Division of International Medical Education: Bibliography on medical education in the developing countries from 1956 to 1964, 931; First Annual Conference on International Medical Education, 541
- Executive Director, final report of: Milestones in raising the standards of medical education, Darley, 321
- Group on Student Affairs: Eighth Annual Meeting, 532; Report on nonrefundable grants for medical students in U. S. medical schools, Ceithaml and Johnson, 245

Institute (1962), Tenth Teaching (Jan., Part 2): Organizational roster, iii; (*Preface*), Anderson, v; Objectives of, and its report, vii; Organization of, 396; Program, 396; Roster of participants, 398

Institute (1964), Second Administrative (Nov., Part 2): Organizational roster, iii; (*Preface*), Berson, v; (*Introduction*), Wolf, 3; (*Epilogue*), Darley, 208; Organization of, 213; Program, 214; Roster of participants, 216; Bibliography, 238; Report of the program, 615

Institutional membership meeting: February 8, 1964, 527

Medical School—Teaching Hospital Section: Seventh Annual Meeting, 540

Meeting, Annual, 1964: Abraham Flexner Award to Ward Darley, 566; Alan Gregg Lecture—Robert Swain Morison, 566; Borden Award to Harry Eagle, 565; 75th Anniversary Merit Awards, 565; Business Meeting, 570; Foreign Guests, 566; Introduction of New Deans, 564; Introduction of New Provosts and Vice-Presidents, 565; Program, 565, 568

Officers of (1964-65), 617

Reports: of the Chairman of the Executive Council, 570; of the Committee on Federal Health Programs, 598; of the Committee on International Relations in Medical Education and the Division of International Medical Education, 591; of the Committee on Medical Communications, 600; of the Committee on Medical Education for National Defense, 600; of the Committee on Medical School—Affiliated Hospital Relationships, 603; of the Committee on Medical School—Veterans Administration Relationships, 604; of the Committee on Research in Education and the Division of Education, 583; of the Committee on Student Affairs, 605; of the Committee on the Study of New Drugs, 606; of the Director, Division of Business Affairs, 576; of the Director Division of Operational Studies, 579; of the Editor and Editorial Board, *The Journal of Medical Education*, 597; of the Executive Director, 572; of the Nominating Committee, 610; of the Secretary, 572; of the Treasurer, 573

Research in Medical Education: Proceedings of the Third Annual Conference on: (*Foreword*), Sanazaro, 73; Pro-

- gram Committee, 74; (*Editorial*), Sanazaro, 221; Program, 613. Fourth Annual Conference on: (*Announcement*), 220; Program, 890; Abstracts, 892
- Seminar on research in patient care (*Communication*), Sanazaro, 796

**Borden Award:**

- To Paul Charles Zamecnik, Gurin, 1016

**Communications:**

- Instruction in scientific, DeBakey, 928
- The medical lecture as an art form (*Communication*), Carton, 1168

**Comprehensive Medicine:**

- Analysis of student performance in a social medicine course, Wagner, 286
- Comprehensive care programs in university medical centers, Snoke and Weinerman, 625
- Conference approach to, with inpatient emphasis, Bates, 778
- Home care as an experiment in medical and nursing education, Lewis, 84
- Increasing role of paramedical personnel, Buerki, 850
- Program of instruction in family medicine, Carmichael, 370
- Teaching of, an exploratory study of some short-term effects, Shaffer *et al.*, 948

**Conferences:**

- Report of the Conference of the Association of Teachers of Preventive Medicine (Oct., Part 2): (*Foreword*), Bakst, v; Program, 129; Conference Officers, 131; Committees, 132; Roster of Participants, 136
- Research in Medical Education, Proceedings of the Third Annual, on: (*Foreword*), Sanazaro, 73; Program Committee, 74; (*Editorial*), Sanazaro, 221; Program, 613. Fourth Annual, on: Program, 890; Abstracts, 892
- Rochester Conference report on program-med instruction in medical education (*Communication*), Lysaught and Jason, 474

**Continuation Education:**

- Diffusion of innovation in medicine as a problem of, McLaughlin and Penchansky, 437

- Establishing priorities in (*Abstract*), Williamson *et al.*, 897

- Examinations as devices for evaluating performance in a program of, Richardson, 972

- New York Academy of Medicine TV-PG efforts in a metropolis (*Communication*), McGuinness, 878

- Present status of the AMA accreditation of (*Communication*), Rosenow, 998

**Curriculum:**

- Administration of a coordinated teaching, Spilman, 1049
- Bio-medical engineering in the hospital setting, Jacobs, 681
- Comprehensive care programs, Snoke and Weinerman, 625
- Computer programming, Long *et al.*, 675
- Conference approach to comprehensive medicine with inpatient emphasis, Bates, 778
- Critical evaluation of research and teaching in anatomy (*Editorial*), Stokes, 978
- General surgery and surgical specialties (*Communication*), Child, 703
- Home-Care Program: Home care as an experiment in medical and nursing education, Lewis, 84; Study of the effects of a, on the attitudes of first-year students (*Abstract*), Lewis, 904; Technique for generating professional identity (*Abstract*), Tomich, 905
- Instruction in scientific communications, DeBakey, 928
- Medical psychology, Seguin, 281
- Place of anatomy in the (*Editorial*), Crafts, 979
- Preventive medicine and public health (*Communication*), Grant *et al.*, 488
- Program of instruction in family medicine, Carmichael, 370
- Psychiatric training program at the medical student level (*Communication*), Plutzky, 1097
- Student performance in a social medicine course, Wagner, 286
- Symposium on technical surgery and undergraduate medical education (*Communication*). See *Surgery*
- Teaching mental retardation in the psychiatric curriculum (*Communication*), Philips, 1170
- Teaching the psychologic aspects of obstetrics and gynecology (*Communication*), Campbell, 809

The 2-4-2 Program at Wayne State University, Scott *et al.*, 510

#### Datagrams:

- Annual medical school expenditures for sponsored and regular operating programs, 314
- Application activity and MCAT data of applicants to the class of 1964-65, 1003
- Costs of conducting sponsored research, 492
- Failure to graduate from medical school, 885
- Medical library needs, 396
- Medical school application trends for classes entering 1954-1965, 621
- Medical school deans' tenure of office, 1099
- Medical school—V.A. hospital relationships, 715
- Medical student finances, 1962-64, 67
- National Institutes of Health Training Grants 1958-1965, 1173
- Results of the National Intern Matching Program for 1965, 812
- Undergraduate origins of medical students, 223

#### Drugs:

- Class experiment in drug metabolism (*Communication*), Shuster and Hanam, 805
- Teaching experiment to determine the effect of cyclobarbitone on mental performance (*Communication*), Smith and Sullivan, 294

#### Evaluation:

- Assessing clinical judgment of physicians, Williamson, 180
- Audiovisual Materials: Development of a reviewing procedure for, Humphreys *et al.*, 742; Need for critical review and evaluation of (*Editorial*), Ham and Miller, 792
- Critical-comments approach to the rating of medical students' clinical performance, Cowles, 188
- Design for, of clerkships (*Abstract*), McGuire and Smith, 909
- Examinations: As devices for, Richardson, 972; Experience with objective written, in an orthopedic surgery training program (*Abstract*), Peterson and Welch, 901; Evaluating 2 methods of examination in a junior dermatology

course (*Abstract*), Levan and Brading, 903; Importance of cueing items in an objective examination (*Abstract*), McCarthy, 911; Objective, and the art of medicine (*Abstract*), Gottheil and Cornelison, 901; The oral examination as a measure of professional competence (*Abstract*), McGuire, 908; Study of the oral examination in third-year medicine (*Abstract*), Evans *et al.*, 892; Use of videotape recordings for, in anatomy, Markee *et al.*, 214

Of the college environment, Stern, 132

Of a pediatric house-officer program by its alumni, North, 1145

Of student performance in a clinical psychiatry clerkship, Vigliano and Gaitonde, 205

Of student skills in physical diagnosis, Evans and Bybee, 199

Of teaching and examination techniques, an experiment in postgraduate education, Gauvain *et al.*, 516

The Psychotherapy Interaction Scale as an instrument to measure skill in diagnostic interviewing (*Abstract*), Adler and Enelow, 902

A test of skill in the critical evaluation of scientific information (*Abstract*), Zimmerman and King, 902

Examinations: See Evaluation

Family Medicine: See Comprehensive Medicine

#### Federal Government:

Developments at the NIH relating to preventive medicine, Kidd (Oct., Part 2), 61

Federal aid for medical school construction (*Communication*), Graning, 310

General Research Support Grants from the standpoint of the medical school, Miller, 329

General Research Support Grants from the standpoint of the National Institutes of Health, Stone, 337

Health sciences and, Kidd, 667

Higher education and (*Editorial*), Cooper, 472

How medical students finance their education (*Editorial*), Johnson, 868

NIH Training Grants 1958-1965 (*Data-gram*), 1173

Role of military medicine (*Editorial*), Hyde, 620

S.597 (Medical Library Assistance Act of 1965) (*Editorial*), Cooper, 291

**Flexner Award:**

To Joseph Treloar Wearn, Handler, 1009

**General Practice:** See Medical Practice

**Health Services:**

Organization of, Reader ed. (Jan., Part 2), 46

Public policy and financing for, Rorem and Sigmond (Jan., Part 2), 79

**Higher Education:**

See also Universities

The federal government and (*Editorial*), Cooper, 472

**History:**

AAMC milestones in raising the standards of medical education, Darley, 321

Earned degrees in the fields of medicine, 1901-1962, and projections to the year 2000, Karel, 455

Of German medical education, Thauer, 343

Of medical organizations in Latin America, Neghme, 429

Pompe van Meerdervoort and the first western medical school in Japan, Taniguchi and Bowers, 448

Reviews of films on medical history (Apr., Part 2), 18

**Hospitals:**

Bio-medical engineering in, Jacobs, 681  
Changes in nurse-physician relationships within, Pratt, 767

Faculty appointment, promotion, and termination in (*Editorial*), Wolf, 376

Functions of the university hospital, Bonnet (Jan., Part 2), 122

Health services, patients, and, Sheps (Jan., Part 2), 50

Increasing role of paramedical personnel, Buerki, 850

Integration of hospital training programs in Tucson (*Communication*), Ramsay and Durbin, 993

Interdependence of medical schools and, for education and service, Sheps *et al.*, Sept., Part 2. See Medical Schools

Medical school—V.A. hospital relationships (*Datagram*), 715

Report of the Second Administrative Institute on medical school-teaching hospital relations. See Medical Schools

Role of, in teaching (*Communication*), Walker *et al.*, 305

Role of the community hospital, Leonard and Hamilton (Jan., Part 2), 128

Some factors influencing medical education in the community hospital (*Abstract*), Butler *et al.*, 894

**Interdisciplinary Studies:** See Universities

**Interns, Internship:**

Foreign interns and residents in the United States, West, 1110

Integration of hospital training programs in Tucson (*Communication*), Ramsay and Durbin, 993

Measurement of growth in clinical judgment during (*Abstract*), Fisher and Williamson, 909

Post-internship evaluation of internship service rotation (*Abstract*), Hickman, 895

Problems and experiences of (*Abstract*), Miller *et al.*, 894

Results of the National Intern Matching Program for 1965 (*Datagram*), 812

Role of, in teaching hospitals, Sheps *et al.* (Sept., Part 2), 83

The rotating internship, Creditor, 364

**Laboratory Education:**

A flexible teaching laboratory in biochemistry, Winzler, 965

The pharmacology laboratory as a teaching device (*Communication*), Kahn, 870

Reinforcement experiment in laboratory pharmacology as a model for cinematic self-instruction (*Communication*), West and Stickley, 990

Training in laboratory animal medicine in veterinary schools and through post-doctoral programs, Pick, 1063

**Law:**

Interprofessional education and medico-legal conflict as seen from the lawyers' point of view, Powers, 233

Reviews of films on medicine and (Apr., Part 2), 19

**Libraries:**

See also Medical Schools

Relationships of the National Library of Medicine to medical education and research, Wilson and Cummings, 225

**Medical College Admission Test:**

Component scores of, their relationship to postgraduate training (*Abstract*), Buxbaum and Peterson, 892

Current problems in the Verbal and Quantitative Ability subtests of, Funkenstein, 1031

An empirical demonstration of restriction of range artifacts in validity studies of (*Abstract*), Sedlacek and Hutchins, 911

Use of, in predicting success in the first year of medical school, Ingersoll and Graves, 351

**Medical Education**

AAMC milestones in raising the standards of, Darley, 321

Canapé or entree (*Editorial*), Perera, 1166

Coggeshall Report (*Editorial*), Cooper, 700

Comprehensive care programs, Snook and Weirnerman, 625

Costs of, in hospitals, Carroll (Nov., Part 2), 137

Earned degrees in the fields of medicine, 1901-1962, and projections to the year 2000, Karel, 455

Financing of, by medical students, Ceit-haml, 497

Interprofessional education and medico-legal conflict as seen from the lawyers' point of view, Powers, 233

Long-range trends in, Harrell (Nov., Part 2), 19

And practice, Report of Tenth Teaching Institute on (Jan., Part 2): (*Preface*), Anderson, v; Objectives of 1962 Institute report, vii; The expectations of society, Wolf, 3; The evolution of the modern practitioner and his place in the system of medical and health care, Hudson, 11; The growth of institutions and the preservation of the individual, McKittrick, 27; What the medical profession can be, Beaton, 35; The implications of population change for the education and training of physicians, Densen, 62; Preparation of practitioners of the future, Lee, 70; The medical school, Maloney, 93; Sources of expenditures for medical schools, Darley *et*

*al.*, 99; The relationship between medical educators and medical practitioners, Kendall, 137; The practitioner and the educator, Roueché, 246; Preceptors, practitioners, and problems, Hussey, 253; Some socioeconomic observations on medical education and the practicing profession, Somers, 258; Adaptation to change as a means for establishing possible new relationships, Beaton, 278; Understanding and misunderstanding, Dryer, 284; The Institute as reflected by its panels, 292; The Institute as reflected by the discussion groups and the post-institute commentaries, Caseley, 361; Implications of the Institute for the university, the medical profession, and the general public, Darley, 387; Organization of the 1962 Institute, 396; Roster of participants, 398; Results of a survey on practitioner attitudes toward medical schools and faculties, 408

Relationships of the National Library of Medicine to, and research, Wilson and Cummings, 225

Report of the Rochester Conference on programmed instruction in (*Communication*), Lysaught and Jason, 474

Symposium on technical surgery and undergraduate medical education (*Communication*). See Surgery

Teaching emergency care and disaster management at a university hospital (*Communication*), Walker *et al.*, 305

The 2-4-2 Program at Wayne State University, Scott *et al.*, 510

Use of computers in processing medical information, Lindberg, 753

Utility of programmed methods in, Miller *et al.*, 817; Allender *et al.*, 825

**Medical Education Abroad:**

Africa: Role of a rural health center in the teaching program of a medical school in East Africa, Bennett *et al.*, 690

Asia: Pompe van Meerdervoort and the first western medical school in Japan, Taniguchi and Bowers, 448

Australia: Experiment in teaching anatomy, Sinclair, 401

Europe: England: Experiment in postgraduate medicine to evaluate teaching and examination techniques, Gauvin *et al.*, 516; Germany: Medical education today and tomorrow, Thauer, 343

Latin America: Development of medical education in Paraguay through an AID-University contract, McCarthy, 956;

Medical education in the Americas, Neghme, 429; Use of the group method of teaching in the University of San Marcos School of Medicine, Seguin, 281

#### Medical Education—Basic Science Education:

- Flexible teaching laboratory in biochemistry, Winzler, 965
- The health sciences and the federal government, Kidd, 667
- The pharmacology laboratory as a teaching device (*Communication*), Kahn, 870
- Physiology and pathology, aseptic animal surgery as an adjunct to teaching (*Communication*), Woodward and Dragstedt, 382
- Parasitology in prospect (*Communication*), Mueller, 300
- Reinforcement experiment in laboratory pharmacology by film (*Communication*), West and Stickley, 990
- Reviews of films useful in (Apr., Part 2): Biochemistry, 6; Microbiology, immunology, virology, and parasitology, 21; Pathology, 42; Physiology, 51

#### Medical Education—Clinical Education:

- Chart review and its application to (*Abstract*), Babbott and Argall, 903
- Clinical investigation and medical residency training, Martin and Jeghers, 75
- Comparison of prognoses of gastroenterologists, medical students, and college undergraduates (*Abstract*), King and Manegold, 908
- Comparison of grand rounds patients with matched controls as teaching cases, Melges and Bates, 1070
- Conference approach to comprehensive medicine with inpatient emphasis, Bates, 778
- Critical-comments approach to the rating of medical students' clinical performance, Cowles, 188
- Electronic retrieval of clinical data, Lindberg, 753
- Diagnosis: Evaluation of student skills in physical diagnosis, Evans and Bybee, 199; Medical student pathways to, Weitman and Coisman, 166
- Evaluation of a pediatric house-officer program by its alumni, North, 1145
- Evaluation of student performance in a clinical psychiatry clerkship, Vigliano and Gaitonde, 205

Expectation and experience in the reactions of medical students to patients with chronic illness, Ort *et al.*, 840

General Clinical Research Centers program (*Communication*), Brown *et al.*, 482

The house-officer as a medical educator (*Communication*), Barrow, 712

The measurement of growth in clinical judgment during the internship (*Abstract*), Fisher and Williamson, 909

Program of instruction in family medicine, Carmichael, 370

Reviews of films useful in (Apr., Part 2): Neurology, 29; Obstetrics and gynecology, 32; Orthopedics, 35; Otolaryngology, 39; Pediatrics, 49

The rotating internship, Creditor, 364

Self-education for clinical teachers (*Abstract*), Ham *et al.*, 904

Teaching, in small groups, Schieve, 92

Teaching mental retardation in the clinical years (*Communication*), Phillips, 1170

Undergraduate surgical education in outpatient and emergency services (*Communication*), Burdette and Stevens, 390

#### Medical Education—Graduate, Postgraduate:

- Assessing clinical judgment of physicians as a means of evaluating, Williamson, 180
- Bio-medical engineering, Jacobs, 681
- Experiment in, to evaluate teaching and examination techniques, Gauvain *et al.*, 516
- Postdoctoral and veterinary school training programs in laboratory animal medicine, Pick, 1063
- Research, graduate education, and postdoctoral training in Preventive Medicine: Report of the Conference of the Association of Teachers of Preventive Medicine. *See* Preventive Medicine
- A study of information gained in (*Abstract*), Manning and Abrahamson, 906
- Teaching postgraduate clinical medicine, Campbell (Jan., Part 2), 116

#### Medical Education—International Perspective:

- Bibliography on medical education in the developing countries from 1956 to 1964, 931
- Foreign interns and residents in the United States, West, 1110

- Medical education in developing countries, Grzegorzewski, 862
- Medical education in developing countries (*Communication*), Hyde, 298
- Role of military medicine (*Editorial*), Hyde, 620

**Medical Faculty:**

- Administration of a coordinated teaching curriculum, Spilman, 1049
- Analysis of the ratings by medical students of the performance of full-time and voluntary teachers (*Abstract*), Cotsonas *et al.*, 905
- Appointment, promotion, and termination of (*Editorial*), Wolf, 376
- Faculty and staff appointments in teaching hospitals, Sheps *et al.* (Sept., Part 2), 39
- And medical practice (*Abstract*), Ford *et al.*, 899
- Toward the resolution of town versus gown (*Editorial*), Aring, 378

**Medical Practice:**

- The academic physician and (*Abstract*), Ford *et al.*, 899
- Changes in, as it affects nurse-physician relationships, Pratt, 767; Schlotfeldt, 772
- Comparison of the professional functions of rural and urban general practitioners, Greenhill and Singh, 856
- Diffusion of innovation in medicine as a problem of continuing medical education, McLaughlin and Penchansky, 437
- Evolution of the modern practitioner and his place in the system of medical and health care, Hudson (Jan., Part 2), 11
- Interprofessional education and medicolegal conflict as seen from the lawyers' point of view, Powers, 233
- Medical education and, Report of the Tenth Teaching Institute (Jan., Part 2). See Medical Education
- Organization of, in the U.S., Wolf, 737
- Organization without bureaucracy—editorial comment, Wolf (Jan., Part 2), 44
- Patterns of, in the U.S., Roemer, 1154
- Physicians' attitudes of cynicism and humanitarianism before and after entering, Gray *et al.*, 760
- Toward the resolution of town versus gown (*Editorial*), Aring, 378
- What the medical profession can be, Beaton (Jan., Part 2), 35

**Medical Schools:**

- Administration of a coordinated teaching curriculum, Spilman, 1049
- Admissions: Background data of significance to medical student performance, Motto, 98; Current problems in the Verbal and Quantitative Ability subtests of the MCAT for, Funkenstein, 1031; Medical school application trends for classes entering 1954-1965 (*Datagram*), 621; Predictability of success in the first year of medical school, Ingersoll and Graves, 351; Study of applicants, 1964-65, Johnson, 1017; Study of inter-rater reliability in the admissions interview (*Abstract*), Lee and Abrahamson, 905
- Characteristics of, and dropout rate as factors in the AAMC attrition study, Hutchins, 921
- Deans' tenure of office (*Datagram*), 1099
- Development of the School of Medicine at the National University in Asuncion, Paraguay through an AID-University contract, McCarthy, 956
- Expansion of facilities and programs needed to meet future need for physicians (*Communication*), Darley, 1086
- Expenditures: Annual, for sponsored and regular operating programs (*Datagram*), 314; Costs of conducting sponsored research (*Datagram*), 492; Differential cost in programmed instruction and conventional instruction in internal medicine, Allender *et al.*, 825; Sources of, Darley *et al.* (Jan., Part 2), 99
- Finances: General Research Support Grants from the standpoint of the National Institutes of Health, Stone, 337; General Research Support Grants from the standpoint of the medical school, Miller, 329; Health sciences research and the federal government, Kidd, 667; For medical school construction (*Communication*), Graning, 305; The National Fund for Medical Education and corporate giving, Faulkner, 423; Nonrefundable grants for medical students in U.S. medical schools, Ceithaml and Johnson, 245; Physician giving, Powers *et al.*, 414
- Forces that shape the medical school, Evans (Jan., Part 2), 272
- Geographical distribution of, in the U.S. (*Table*), Sheps *et al.* (Sept., Part 2), 151
- Learning and Public Responsibility, Wolf, 1105
- Libraries: Challenge in, Brodman, 1;

- Guidelines for, 5-64: (*Foreword*), Sanazaro, 5; Microtext materials in, Veener, 43; Use of automated systems in, Shera, 46; Use of computers in, Brodman, 50. Library opportunities in new medical schools (*Editorial*), Leake, 292; Needs of (*Datagram*), 396; S.597 (Medical Library Assistance Act of 1965) (*Editorial*), Cooper, 291
- Unmet responsibility of academic medicine to (*Editorial*), Sanazaro, 65
- Planning for facilities of (Nov., Part 2): Glaser, 81; Wilsey, 94; Stull, 116; Wheeler, 227; Shorey, 232
- Relationships with V.A. hospitals (*Datagram*), 715
- Selection of, by students, Aronson *et al.*, 155
- Sites of, Wolf, 506
- And teaching hospitals; interdependence of, for education and service, Sheps *et al.* (Sept., Part 2): (*Foreword*), Darley, iv; Background and method of study for the report on, 1; Description of affiliations, 11; Education, research, patient care, and community service as shared goals of, 22; Faculty and staff appointments, 39; Patients as teaching cases, 51; Student-patient relationships, 67; Role of interns and residents in, 83; Role of patient care in medical education, 100; Complexities of research in, 109; Nature of affiliation agreements between, 124; Problems and solutions in relationships between (*Epilogue*), 146; Study questionnaire on, 154; Definitions and study outline used in field studies on, 155
- And teaching hospital relations, Report of the Second Administrative Institute on (Nov., Part 2): Organizational roster, iii; (*Preface*), Berson, v; Introduction to, Wolf, 3; A layman's view of medical school-hospital relations, Rockefeller, 10; Trend of research requirements in the teaching hospital, Olson, 25; Trends in patient care in the teaching hospital, Viguers, 29; Topography, problems, and essential elements of affiliation, Nourse, 49; Interdependence or unification of, Caseley, 66; Realities and problems of school-hospital relations, Sheps, 76; Historical development of, Glaser, 81; Long-range planning for, Wilsey, 94; Specifics of planning, Stull, 116; Diversities not finance as the source of difficulties in school-hospital relations, Brown, 126; Educational costs in hospitals, Carroll, 137; Institute reactions from a department chairman's view, Pruitt, 149; Institute reactions from a dean's view, Lippard, 158; Social responsibility of medical schools and teaching hospitals from a hospital director's view, Knowles, 167; Analysis of the Institute by a dean, Bucher, 197; Analysis of the Institute by a hospital administrator, Brown, 201; Implications of the Institute for the consumer, Danielson, 204; (*Epilogue*), Darley, 208; Medical center deficiencies as a guide for future planning, Shorey, 232; Features of the teaching hospital, Wheeler, 227; Bibliography of administrative organizational relationships, 228; Bibliography of facilities and planning, 249; Bibliography of financial considerations, 252
- Validity of Hutchins' research-emphasis classification of (*Abstract*), Lent and Huang, 907
- ### Medical Schools by Name:
- Africa: Makerere Medical School, University of East Africa, Uganda, 690
- Australia: Western Australia, 401
- Canada: Alberta, 856
- England: London School of Hygiene and Tropical Medicine, 516; St. Thomas' Hospital Medical School, 294
- Japan: First western medical school, Nagasaki, 448
- Latin America: San Marcos, Peru, 281; São Paulo, Brazil, 785; National University at Asuncion, Paraguay, 956
- U.S.A.: Albany, 625; Arkansas, 675; Baylor, (Nov., Part 2) 167; Boston, 510, 625, (Oct., Part 2) 79; California (L.A.), 286, 310, 388; California (S.D.), 978; California (S.F.), 98, 310; University of Chicago, 161; Colorado, 310, 625; Columbia, 28, 310, 721, (Nov., Part 2) 204; Cornell, 625, (Nov., Part 2) 12, (Nov., Part 2) 81; Duke, 214, 625; Florida, 233, (Nov., Part 2) 81; Georgetown, 488; Harvard, 32, 305, 625, 894, (Nov., Part 2) 81; (Nov., Part 2) 167; Illinois, 47, 125, 199, 817, 825, 907, 965; Iowa, 625; Johns Hopkins, 510, 948, (Nov., Part 2) 81; Kansas, 84, 205, 310, (Apr., Part 2) iii, 792; Kentucky, 625, 778, (Oct., Part 2) 94; Louisville, 625; Loyola, 310; Marquette, 385; Michigan, 906, (Oct., Part 2) 1; Missouri, 535, 753, 893, 896, 898; SUNY (Buffalo), 321, 956, (Oct., Part 2) 79; SUNY (Syracuse), (Nov., Part 2) 143; North Carolina, 625, 895; New Mexico, 310; Northwestern, 510, 625, 681, 870; Ohio State, 92, 351; Oklahoma, 273, 625, 882; Oregon, 166; Pittsburgh, 188, 625, (Jan., Part 2) 296, (Sept., Part 2) 46; Rochester, 474,

1070; Seton Hall, 75; Stanford, 510; Temple, 625, 809; Tennessee, 892, 1017; Tulane, 625, 928; Utah, 310; Vanderbilt, 625; Vermont, 625; Washington University (St. Louis), 28, 46, 625, (Nov., Part 2) 81; University of Washington (Seattle), 990; Wayne State, 510; Western Reserve, 155, 625, 658, 742, 792, 840, (Nov., Part 2) 81, 1049; West Virginia, 1097; Yale, 625, (Oct., Part 2) 79, (Nov., Part 2) 83, (Nov., Part 2) 137

### Medical Students:

AAMC study of medical student attrition: Overview and major findings, Johnson, 913; School characteristics and dropout rate, Hutchins, 921

Application Activity and MCAT Data of, for 1964-65 (*Datagram*), 1003

Attitudes: An approach to measurement of, toward family planning (*Abstract*), Anand and Ahmad, 896; Changes in, toward psychological aspects of the doctor-image and the doctor-patient relationship, Pollack and Michael, 1162; Effect of an experimental seminar on comprehensive medicine on, Shaffer *et al.*, 948; Effect of a home-care teaching program on (*Abstract*), Lewis, 904; Expectation and experience in the reactions of, to patients with chronic illness, Ort *et al.*, 840; Of cynicism and humanitarianism before and after entering medical practice, Gray *et al.*, 760; On becoming a physician, Mendel and Green, 266; Toward a computer programming course, Long *et al.*, 675; Toward group teaching, Seguin, 281; Toward psychiatric patients and the specialty of psychiatry (*Communication*), Garetz and Magraw, 801; Two follow-up studies on, toward medical specialties, Bruhn and Parsons, 273

Characteristics: Authoritarianism and machiavellianism among, as it affects choice of specialization, Coker *et al.*, 1074; Comprehensive study of, based on 1,000 admissions to University of Tennessee College of Medicine (*Abstract*), Crocker, 892; The creative medical student (*Abstract*), Graves *et al.*, 893; Intellectual and personality characteristics of 2 classes of medical students, Kole and Matarazzo, 1130; Intelligence and personality as factors in academic success, Lief *et al.*, 114; Non-intellectual, as related to academic performance patterns (*Abstract*), Motto and Werner, 899; Undergraduate origins of (*Datagram*), 223

Comparison of programmed instruction

with conventional lectures in teaching electrocardiography, Owen *et al.*, 1058

Development of a reviewing procedure for audiovisual materials by, Humphreys *et al.*, 742

Differential achievement with programmed text, teaching machine, and conventional instruction in physiology, Miller *et al.*, 817

Ecology of, and the college environment, Stern, 132

Effects of a home-care program in generating a professional identity (*Abstract*), Tomich, 905

Effects of teaching social pathology to (*Abstract*), Froelich, 896

Exposing the medical student to public health (*Communication*), Grant *et al.*, 488

Failure of, to graduate from medical school (*Datagram*), 885

Financial Situation: American medical students', Ceithaml, 497; Medical student finances, 1962-64 (*Datagram*), 67; Nonrefundable grants for medical students in U. S. medical schools, Ceithaml and Johnson, 245; How medical students finance their education (*Editorial*), Johnson, 868

Introducing the community to (*Abstract*), Davis *et al.*, 898

Performance: Analysis of, in a social medicine course, Wagner, 286; A critical-comments approach to the rating of clinical performance, Cowles, 188; Background data of significance to, Motto, 98; Current problems in the Verbal and Quantitative Ability subtests of the MCAT for predicting, Funkenstein, 1031; Evaluation of, in a clinical psychiatry clerkship, Vigliano and Gaitonde, 205; Evaluation of, in physical diagnosis, Evans and Bybee, 199; On a medical diagnosis test, Weitman and Coisman, 166; Persistence in career choice and achievement in medical school (*Abstract*), Warick and Abrahamson, 898; Relationship of marital status to (*Abstract*), Motto and Werner, 900; A test of skill in the critical evaluation of scientific information (*Abstract*), Zimmerman and King, 902

Predictability of success in the first year of medical school, Ingersoll and Graves, 351

Retention of information (*Abstract*), Froelich, 893

Teaching reparative psychotherapy to, Davanzo, 785

- Relationships between patients and, in teaching hospitals, Sheps *et al.* (Sept., Part 2), 67
- Selection of a medical school by, Aronson *et al.*, 155
- Senior student career choices in retrospect, Boverman, 161
- Time study of activities of, Fisher and Cotsonas, 125
- Medicine:**
- Reviews of films on cardiovascular (Apr., Part 2), 7
- Reviews of films on general (Apr., Part 2), 11
- Nurses:**
- Doctor's view of the changing nurse-physician relationship, Pratt, 767
- Home care as an experiment in medical and nursing education, Lewis, 84
- Nurse's view of the changing nurse-physician relationship, Schlotfeldt, 772
- Pan American Federation of Associations of Medical Schools:**
- Role of, in medical education in the Americas, Neghme, 429
- Patient Care:**
- Role of, in medical education, Sheps *et al.* (Sept., Part 2), 100
- Seminar on research in (*Communication*), Sanazaro, 796
- Students and, in the teaching hospital, Sheps *et al.* (Sept., Part 2), 67
- Trends in, in the teaching hospital, Viguers (Nov., Part 2), 29
- Physicians:**
- Assessing clinical judgment of, Williamson, 180
- Attitudes of cynicism and humanitarianism before and after entering medical practice, Gray *et al.*, 760
- The doctor-image and the doctor-patient relationship, changes in medical student attitudes toward, Pollack and Michael, 1162
- Doctor's view of changing nurse-physician relationship, Pratt, 767
- Implications of population change for the education and training of, Densen (Jan., Part 2), 62
- Nurse's view of the changing nurse-physician relationship, Schlotfeldt, 772
- Physician giving to medical schools, Powers *et al.*, 414
- Preparation of practitioners of the future, Lee (Jan., Part 2), 70
- Preparing for future need for (*Communication*), Darley, 1086
- Reactions of, toward their careers, Ma-wardi, 658
- The true picture of physician income (*Editorial*), Perera, 1085
- Preventive Medicine:**
- Parasitology in prospect (*Communication*), Mueller, 300
- Research, graduate education, and post-doctoral training in, Report of the Conference of the Association of Teachers of Preventive Medicine (Oct., Part 2): (*Foreword*), Bakst, v; Historical background and conference organization, 1; The struggle for excellence in, Price, 8; Recommendations for a graduate and research program in, Wolf, 13; Summary of the workshop on research, Jordan, 33; Summary of the workshop in research training, White, 52; Widening horizons in community health research, Christensen, 57; Developments at the NIH relating to preventive medicine, Kidd, 61; Summary of the workshop on graduate education and postdoctoral, Schottstaedt, 73; Summary of the workshop on university relations, Lepper, 91; Summary of the workshop on community relations, Quinn, 109; Crucial issues facing preventive medicine and public health, Sheps, 112
- Reviews of films on public health and (Apr., Part 2), 55
- Role of a rural health center in the teaching program of a medical school in East Africa, Bennett *et al.*, 690
- Psychiatry:**
- Evaluation of student performance in a clinical psychiatry clerkship, Vigliano and Gaitonde, 205
- One solution to a teaching problem in (*Communication*), Mathis, 882
- Psychiatric grand rounds versus matched controls as teaching cases, Melges and Bates, 1070
- Reviews of films on (Apr., Part 2), 57
- Students' attitudes toward psychiatric patients and the specialty of (*Communication*), Garetz and Magraw, 801
- Teaching mental retardation in the psychiatric curriculum (*Communication*), Phillips, 1170

A training program in, at the medical student level (*Communication*), Plutsky, 1097

Use of audiovisual materials in isolating problems in teaching clinical psychiatry (*Abstract*), Muslin *et al.*, 907

#### Psychological Medicine:

Groups in medical education, Seguin, 281

Study of the learning and teaching processes in psychotherapy (*Abstract*), Guiora *et al.*, 895

Teaching the psychologic aspects of obstetrics and gynecology (*Communication*), Campbell, 809

Teaching reparative psychotherapy to medical students, Davanzo, 785

Use of videotape to provide individual instruction in techniques of psychotherapy, Benschofer *et al.*, 1159

#### Public Health:

Exposing the medical student to (*Communication*), Grant *et al.*, 488

Reviews of films on preventive medicine and (Apr., Part 2), 55

#### Radiology:

Reviews of films on radiation and (Apr., Part 2), 60

#### Research:

Administration of the interdisciplinary research team, Busse, 832

Complexities of, in teaching hospitals, Sheps *et al.* (Sept., Part 2), 109

Costs of conducting sponsored research (*Datagram*), 492

Diffusion of innovation in medicine as a problem of continuing medical education, McLaughlin and Penchansky, 437

Educational potential of animal research facilities (*Communication*), Lutsky and Ellison, 385

Electronic retrieval of clinical data, Lindberg, 753

General Clinical Research Centers program (*Communication*), Brown *et al.*, 482

General Research Support Grants from the standpoint of the medical school, Miller, 329

General Research Support Grants from the standpoint of the National Institutes of Health, Stone, 337

Graduate education, postdoctoral training, and, Report of the Conference of the Association of Teachers of Preventive Medicine. See Preventive Medicine

Health sciences, and the federal government, Kidd, 667

Relationships of the National Library of Medicine to medical education and, Wilson and Cummings, 225

Seminar on, in patient care (*Communication*), Sanazaro, 796

Trends of research requirements in the teaching hospital, Olson (Nov., Part 2), 25

#### Residents, Residency:

Clinical investigation as an integral feature of medical residency training, Martin and Jeghers, 75

Foreign interns and, in the U.S., West, 1110

Role of, in teaching hospitals, Sheps *et al.* (Sept., Part 2), 83

#### Specialization:

Attitude of medical students toward psychiatry (*Communication*), Garetz and Magraw, 801

Authoritarianism and machiavellianism among medical students as it affects the choice of, Coker *et al.*, 1074

Distribution of graduates of medical schools in the U. S. and Canada according to specialties—1900 to 1964, Severinghaus, 721

Organization of medical practice in the U. S., the specialist and the general practitioner, Wolf, 737

Senior student career choices in retrospect, Boverman, 161

Surgical (*Communication*), Child, 703

Two follow-up studies on medical students' attitudes toward medical specialties, Bruhn and Parsons, 273

#### Statistics:

Critical review of the Medical School Environment Inventory (*Abstract*), Hutchins and Nonneman, 912

An empirical demonstration of restriction of range artifacts in validity studies of the MCAT (*Abstract*), Sedlacek and Hutchins, 911

#### Studies:

AAMC attrition study: Overview and major findings, Johnson, 913; School characteristics and dropout rate, Hutchins, 921

- AAMC, of applicants, 1964-65, Johnson, 1017
- AAMC, of physician giving to medical schools, Powers *et al.*, 414
- A career study of physicians, Mawardi, 658
- Distribution of graduates of medical schools in the U. S. and Canada according to specialties—1900 to 1964, Severinghaus, 721
- Of attitudes toward medical specialties, Bruhn and Parsons, 273
- Of the intellectual and personality characteristics of 2 classes of medical students, Kole and Matarazzo, 1130
- Of students' diagnostic skills, Weitman and Coisman, 166
- Time study of student activities, Fisher and Cotsonas, 125

#### Surgery:

- General surgery, surgical specialties, and medical education (*Communication*), Child, 703
- Reviews of films on (Apr., Part 2), 62
- Science in surgery (*Communication*), Lewis, 983
- Symposium on technical surgery and undergraduate medical education (*Communication*): Introduction, Zimmerman, 380; Aseptic animal surgery for medical students as an adjunct to teaching physiology and pathology, Woodward and Dragstedt, 382; Educational potential of animal research facilities, Lutsky and Ellison, 385; Operative surgery in undergraduate education at UCLA, Barker, 388; Undergraduate surgical education in outpatient and emergency services, Burdette and Stevens, 390; The changing role of surgery in anatomy instruction for medical students, Eiseman *et al.*, 393

#### Teaching and Learning:

- Analysis of instructor-student classroom interaction (*Abstract*), Anderson, 910
- Effect of effort on retention and enjoyment of medical training (*Abstract*), Merrill and Buenz, 897
- Grand rounds patients as teaching cases, Melges and Bates, 1070
- Learning and public responsibility, Wolf, 1105
- On becoming a physician, Mendel and Green, 266
- Patients as teaching cases in teaching

hospitals, Sheps *et al.* (Sept., Part 2), 51

Self-education for clinical teachers (*Abstract*), Ham *et al.*, 904

Learning and teaching processes in psychotherapy (*Abstract*), Guiora *et al.*, 895

Teaching experiment to determine the effect of cyclobarbitone on mental performance (*Communication*), Smith and Sullivan, 294

Teaching the psychological aspects of obstetrics and gynecology (*Communication*), Campbell, 809

#### Teaching Methods:

Audiovisual Materials: Development of reviewing procedures for, Humphreys *et al.*, 742; Learning anatomy from videotaped versus live television (*Abstract*), Markee *et al.*, 900; Need for critical review and evaluation of (*Editorial*), Ham and Miller, 792; New York Academy of Medicine TV-PG efforts in a metropolis (*Communication*), McGuinness, 878; Reinforcement experiment in laboratory pharmacology as a model for cinematic self-instruction (*Communication*), West and Stickley, 990; Reviews of selected films for medical teaching (*Foreword*), Ruhe (Apr., Part 2), iii; Use of, in isolating problems of teaching clinical psychiatry (*Abstract*), Muslin *et al.*, 907; Use of videotape to provide individual instruction in techniques of psychotherapy, Benschoter *et al.*, 1159

Conference approach to teaching comprehensive medicine with inpatient emphasis, Bates, 778

Evaluation of a field trip program (*Abstract*), Davis *et al.*, 898

Evaluation of the seminar and the didactic lecture as teaching techniques, Gauthier *et al.*, 516

Experiment in teaching anatomy, Sinclair, 401

Flexible teaching laboratory in biochemistry, Winzler, 965

Groups in medical education, Seguin, 281

The medical lecture as an art form (*Communication*), Carton, 1168

One solution to a teaching problem in psychiatry (*Communication*), Mathis, 882

Ophthalmology two-day intensive teaching program (*Abstract*), Froelich, 803

The pharmacology laboratory as a teaching device (*Communication*), Kahn, 870

Programmed Instruction: Comparison of, with conventional lectures in the teaching of electrocardiography, Owen *et al.*, 1058; Differential achievement and differential cost in programmed instruction and conventional instruction in internal medicine, Allender *et al.*, 825; Differential achievement with programmed text, teaching machine, and conventional instruction in physiology, Miller *et al.*, 817; Report of the Rochester Conference on, in medical education (*Communication*), Lysaught and Jason, 474

Some short-term effects of a seminar method of teaching comprehensive medical care, Shaffer *et al.*, 948

Teaching clinical medicine in small groups, Schieve, 92

Teaching computer programming to medical students, Long *et al.*, 675

Teaching the preparation and administration of medications (*Abstract*), O'Connor and Okamoto, 906

Teaching reparative psychotherapy, Davanzo, 785

Use of videotape recordings for examinations in anatomy, Markee *et al.*, 214

#### Universities:

Administration of the interdisciplinary research team, Busse, 832

Bio-medical engineering and its influence on university associated hospitals, Jacobs, 681

Cooperation with medical schools, hospitals, community, Darley (Nov., Part 2), 208

Expectations of a university hospital, Wolf *et al.* (Jan., Part 2), 294

Functions of the university hospital, Bonnet (Jan., Part 2), 122

Implications of the Institute for, Darley (Jan., Part 2), 387

Interprofessional education and the medicolegal conflict as seen from the lawyers' point of view, Powers, 233

Mission of, Wessell (Jan., Part 2), 352

Student ecology and the college environment, Stern, 132
